1 Introduction

This document serves as an example paper. It illustrates the format we expect authors to follow when submitting the camera ready version to ECCV.

Fig. 1. One kernel at x_s (*dotted kernel*) or two kernels at x_i and x_j (*left and right*) lead to the same summed estimate at x_s . This shows a figure consisting of different types of lines. Elements of the figure described in the caption should be set in italics, in parentheses, as shown in this sample caption. The last sentence of a figure caption should generally end without a full stop

Fig. 2. x

2 Paper formatting

If possible (e.g. if you use L^AT_EX) please define figures as floating objects. L^AT_EX users, please avoid using the location parameter “h” for “here”. If you have to insert a pagebreak before a figure, please ensure that the previous page is completely filled.

3 Conclusions

The paper ends with a conclusion.

Now we have reached the maximum size of the ECCV 2014 paper (excluding references). References should start immediately after the main text, but can continue on p.15 if needed.
